---

Enthusiastic and dedicated Computer Science student with practical experience in web development using the MERN stack. Moderately skilled in Core Java and JavaScript, with a good understanding of building RESTful APIs and developing user interfaces using React.js. Familiar with both SQL and NoSQL databases like MySQL and MongoDB. Comfortable using tools like Git, GitHub, VS Code, and Hoppscotch for version control and API testing. Eager to learn new technologies and continuously improve through hands-on projects and real-world problem-solving

## SKILLS

- 
- **Programming Languages:** Core Java
  - **Web Development:** React.js , Node.js , Express.js ,EJS, HTML , CSS , JavaScript , REST APIs .
  - **Databases :** MySQL, MongoDB
  - **Version Control:** Git, GitHub
  - **API Testing Tools:** Hoppscotch
  - **Other Tools:** VS Code ,MongoDB Compass.

## PROJECTS

### Room Finder- Airbnb Clone Website:

Created a room listing and booking platform using Node.js, Express.js, EJS, and MongoDB. Enabled dynamic room listings, search by location, and booking form with prompt alerts.

### ConnectMeet – Real-Time Video Conferencing & Chat Website:

Developed a secure, real-time video conferencing website using WebRTC, Socket.io. Enabled video meetings and live chat using unique meeting codes with authentication support.

### FindMySpace – Roommate & Room Finder Platform (Final Year Project):

Built a full-stack platform with role-based access, room posting with images, location-based search, booking & messaging, roommate matching(Weighted Rule Based Algo), and JWT authentication.
